PROFESSIONAL SUMMARY

Full Stack .NET Developer with 4+ years of experience building enterprise applications using .NET Core, ASP.NET Core, Angular, SQL Server, and PostgreSQL. Experienced in designing and developing scalable REST APIs, optimizing application performance, and delivering business-critical features for ERP, logistics, and real-time systems.

Hands-on experience with microservices-based applications and AWS cloud services, with a strong focus on building reliable, maintainable, and scalable solutions. Proven ability to take ownership of features from requirement analysis through deployment while collaborating with cross-functional teams to deliver high-quality software.

EXPERIENCE

SliverXis | *Senior Software Engineer* | Ahmedabad, India

Sep 2025 – Present

- Developing enterprise-grade ERP modules for the aviation industry supporting aircraft operations and internal workflows.
- Designing and implementing scalable RESTful APIs using .NET to support complex ERP functionality.
- Contributed to microservices-based application development and cloud-hosted solutions on AWS.
- Translating business requirements into scalable technical solutions across frontend, backend, and database layers.
- Designing and optimizing database queries and functions to improve application performance and reliability.
- Collaborating with cross-functional teams to deliver high-impact ERP features used across multiple operational departments.

Tatvasoft | *Senior Software Engineer* | Ahmedabad, India

Sep 2023 – Sep 2025

- Worked on requirement analysis along with the implementation of core system features, including subscription management and periodic timer services.
- Designed and developed dynamic forms and APIs for seamless third-party integrations.
- Created responsive and mobile-optimized UI designs to ensure cross-platform compatibility.
- Developed and tested Sitefinity CMS pages and widgets for enhanced content management.
- Integrated real-time shipment tracking and management features using RESTful APIs.
- Worked with AWS services including EC2, S3, and CloudWatch for application hosting, file storage, monitoring, and environment management.

Peerbits Solutions | *Software Engineer* | Ahmedabad, India

Sep 2021 – Aug 2023

- Worked as a Full stack Developer and worked on more than 10+ modules in this application, Also responsible for Requirement Analysis (Questions/Answers), Database, Frontend and Back-end Development.
- Primary work involves developing SPA in angular by using angular features like pipes, routing, data binding, event binding, components, service, dependency injection, observable, forms and angular CLI.
- Gained practical knowledge of writing angular code in fast paced professional environment following best practices.
- Implemented and have Hands-on knowledge of RxJS library concepts like Observable, Subject, Observer and more.
- Involved in developing multiple End to End features for the product using Angular as Client and C# in .NET web API as backend.
- Implemented the Notification service which send real-time notification to using .NET core SignalR functionalities. As well as explore in depth features of .NET core SignalR for development of the real time chat module.

- Developed a general-purpose platform where we can use different services like Text Paraphrasing, Summarization, Product Review Writing, Content Writing
- Learned about Agile Methodologies

EDUCATION

Dharamsinh Desai University | Nadiad, India
Bachelor of Technology in Information Technology

May 2021
CPI: 7.52

MCZ Shah Higher Secondary | Navsari, India
Higher Secondary - Science (PCM)

May 2017
84.92%

TECHNICAL SKILLS

Languages/Database: C#, SQL Server, PostgreSQL, MySQL, MongoDB

Technologies: .NET Core, ASP.NET Core, ASP.NET MVC, Angular, AngularJS, SignalR

Cloud: AWS (EC2, S3, IAM, CloudWatch)

Concepts: REST APIs, Microservices, SOLID Principles, Design Patterns, Clean Architecture, OOP

Tools/AI Tools: Git, Bitbucket, Jira, GitHub Copilot, Claude, ChatGPT

PROJECTS

LEAN MANAGEMENT MODULES | .Net 6 API, Angular 12 with NgRx

- Developed a versatile Kanban Board allowing task and project cards alignment with varying dates and users.
- Spearheaded the implementation of a Web-based File Explorer mirroring Windows functionality, enabling cut, copy, rename, delete, upload, and download actions.
- Designed and created the Focus Dashboard, integrating multiple filters for comprehensive report generation.
- Orchestrated the Strategy Deployment module, applying Hoshin Kanri principles to ensure seamless alignment of strategic goals throughout the company.
- Successfully accomplished the complex Strategy Breakdown, involving intricate resource management and dynamic data object handling.
- Innovated the X-Matrix, providing the client with a unique, compass-oriented visualization tool for strategic planning.
- Built the Idea Management and KPI-Aggregation modules to streamline idea handling and automate data feeding processes.
- Engineered Strategy Breakdown, enabling inter-strategy object use with distinct aliases and behaviours

ON-DEMAND SERVICE PROVIDERS PRODUCT | Angular

- It is cloud-based solution for all On Demand services like Taxi service, Parcel transport, Food delivery.
- Developed module for above services like delivery, Cargo. Includes, Customer application, Driver Application, Web portal for managing Driver and Rides and Relationship with vehicles and relevant entities.
- Implemented Ride Booking with the google map integration along with the dynamic waypoints.
- Implement responsive design principles to ensure cross-platform compatibility and optimal user experience.
- Integrate RESTful APIs to fetch and manipulate data from the server

ONLINE INSURANCE PORTAL | C#, .Net MVC, SQL Server, Angular

- It deals with various kinds of insurance including Home Insurance, car Insurance, Life insurance, Travel Insurance, Motor Insurance.
- Developed and maintained web applications using .NET MVC, C#, and SQL Server.
- Rebranding of the portal using the Angular framework (Angular 15+) and Social login and authentication module for portal.

DONATION COMMUNITY PLATFORM / *C#, .Net MVC, SQL Server, Angular, SignalR*

- Pioneered the integration of real-time communication features by developing group chat and private chat modules using SignalR
- Designed and optimized database structure to support community, group, and chat functionalities for efficient data handling
- Implemented a real-time notification system with SignalR to deliver instant updates and activity alerts to users
- Integrated advanced member management features, enabling group admins to effectively manage and moderate user interactions

ADVANCED LOGISTIC MANAGEMENT SYSTEM | *C#, .NET, JavaScript, AngularJS, jQuery, RESTful APIs, HTML5, CSS3, SQL, VB.NET, Git, Jira*

- Developed and maintained a comprehensive logistics management platform to streamline international and domestic shipping, freight forwarding, and last-mile delivery.
- Built and integrated real-time shipment tracking and customs clearance features using RESTful APIs.
- Worked on subscription module and periodic timer service to automate recurring operations and notifications.
- Designed and implemented dynamic forms to support flexible user inputs and workflows.
- Developed responsive and mobile-optimized UI to ensure a consistent user experience across all devices.
- Created and customized Sitefinity CMS pages and widgets for content management and configuration flexibility.
- Collaborated with cross-functional teams using Git and Jira for version control and task tracking.

SPORTS MANAGEMENT PLATFORM | *Angular, .NET, SignalR, PostgreSQL*

- Built a feature-rich sports management system enabling creation and management of events, favourites, and role-based access control.
- Developed event management modules supporting create, edit, filter, and list functionalities with responsive design.
- Integrated real-time notifications using SignalR to keep users updated with instant activity alerts.
- Implemented user role and permission management to handle access across different modules.
- Engineered backend APIs and optimized PostgreSQL queries to support efficient data access and system performance.
- Worked with AWS services including EC2, S3, RDS, CloudWatch and IAM for application deployment, monitoring and storage management.

AVIATION ERP SYSTEM | *.NET, Angular, SQL MANAGEMENT SERVER, SSRS*

- Worked on an enterprise ERP system for the aviation domain, enhancing operational workflows and features.
- Developed RESTful APIs using .NET and dynamic UI modules using Angular.
- Implemented Redis caching to reduce database load and improve API response times.
- Optimized database functions and improved query performance.
- Developed and deployed SSRS reports for operational insights and business reporting.
- Developed and consumed microservices-based APIs for independent business modules, improving scalability and deployment flexibility.
